Feedback on coursework provided by Professor Paul Dowling

Critical Review of Douglas & Carless

This is an excellent review that evidences a sophisticated understanding of the methodological issues that it addresses and that brings an independent critical perspective to the reviewed article.

Research Proposal

This is a very thoughtful piece of work showing evidence of a good level of understanding of the antecedent research reviewed and of the methodological issues introduced. The project that is proposed is viable and promises to provide important insights into the possible effects of the removal of constraint in teaching, which, as the author notes, is a situation that is different from that of the imposition of constraint.

General

Both pieces of work are well written and well presented.
